INTRODUCTION

County Business School's Project Management Academy was set up to provide qualitative management training and consulting services to customers in areas of Project Management, Health, Safety and Environment Management, as well as Supply Chain Management. We have grown from a humble beginning since year 2006 to becoming one of the most respected names in the Project Management community in Nigeria.

ABOUT APICS

APICS, The Association for Operations Management is the global leader and premier source of the body of knowledge in operations management, including production, inventory, supply chain, materials management, purchasing, and logistics. Started in United States in 1957, individuals and companies have relied on APICS for its superior training, internationally recognized certifications, comprehensive resources, and worldwide network of accomplished industry professionals.

What is the APICS (CSCP) Certified Supply Chain Professional?

The APICS CSCP brings your company's entire value chain into perspective. By giving you a truly end-to-end view of the supply chain, you become the expert, not just within your organization's walls—you become the global expert.

From manufacturing to service, in business and consumer markets, the increasingly important role of effective supply chain management affects all organizations. Customer expectations are high—with the APICS CSCP, you can ensure that your company not only meets, but exceeds them. For more information, please see APICS website at www.apic.org.

Our APIC supply chain Certification program is comprehensive, integrated and uniquely designed to address:

- *Specific challenge for your company in the class*
- *Comprehensive learning that broadens your knowledge base*
- *Practical, real-world solutions that can add value to your customers*
- *Expert insights from Supply Chain industry leaders and highly qualified educators*
- *Prepare participants to seat and pass the APIC CSCP Exam*
- *Network with other supply chain professionals*

OUR OBJECTIVE

Our objective is to help supply chain and logistics professionals to enhance their leadership skills, broaden their knowledge base, link supply chain strategy to their corporate business plan and help them attain world-wide recognition to compete globally.

CERTIFIED SUPPLY CHAIN PROFESSIONAL (CSCP)

The Certified Supply Chain Professional (CSCP) program is a new industry educational and certification program created by APICS to meet the rapidly changing needs of the supply chain management field.

This course share unique insights gained from discussions with engineers, purchasing managers, operations managers, logistics managers, sales personnel and subject matter experts in several different industries. These experiences have been synthesized to create a managerial perspective of the core tasks and challenges required to effectively develop supply chains in the future.

Building Supply Chains of the Future

This course is unique, in that it describes a strategy that is evolving as we speak. While other prior courses have dealt with the individual processes associated with developing new products, buying materials, transforming them, and shipping them to customers, none have dealt with the integration of information and material flows across multiple organizations. Because supply chains involve members from every single function within organizations, the course has been designed for a general audience, and is intended to provide insights into what a supply chain is, why it is becoming important, the future challenges that lie ahead for managers and helping participants to become APICS professionals who are recognised across the world.
